COURSE INTRODUCTION

One of the main air pollution control system widely used in the industries in Malaysia for the control of dust pollutant is bag filter dust collector. The success operation of a Bag Filter Dust Collector is primarily in the hands of the operator. A knowledgeable and skilled operator, supervisor or engineer knows how to monitor the processes occurring in his bag filter, understand what factors affect the bag filter performance, knows what operational conditions are best for his bag filter and how to maintain them, know how to respond to upset conditions, understand the social obligations and legal implications for non-compliance.

Successful operation of a bag filter is an integral part of the operation of a successful industry. A trained and skilled bag filter operator, supervisor or engineer is not anymore a luxury but rather a must-have to the industry. Good environmental performance not only portray positive corporate image, but avoid possibility of factory downtime and hefty monetary penalties due to legal actions from the environmental authority. EiMAS is providing a training program to train your bag filter operators, supervisors and engineers to be competent in operating bag filter particularly in conducting performance monitoring of the bag filter. The competent person will ensure that the bag filter is operating optimally. This unique training course which focuses on hands-on approach is in fact the only one of its kind in Malaysia.

A Certificate of Competency will be awarded to participants who successfully :

- Complete 5-days course
- Pass the examination
- Submit a field training report

COURSE OBJECTIVE

- Effective bag filter performance monitoring and preventive maintenance
- Proper bag filter operation to ensure smooth production
- Cost reduction in maintenance & production down time
- To comply to DOE Environmental Quality Act 1974 and Clean Air Regulations 2014 to avoid penalty

COURSE METHODOLOGY

- Lectures
- Course assignment
- Hands on practical training using industry size bag filter dust collector at our Hands-on Air Pollution Control Training Center
- Group discussion

COURSE CONTENT

Day 1

- Introduction of Air Pollution Control System (APCS)
- Introduction of various types of bag filter dust collector
- DOE legal requirement

Day 2

- Dust Collector Components (Hands-on training)
- Fan introduction

Day 3

- Performance monitoring & Record keeping as per DOE requirement
- Preventive maintenance

Day 4

- Hands-on performance monitoring
- Bag filter common operating problems and troubleshooting
- Case study
- Field training report preparation

Day 5

- Examination (Practical & Written)
- Presentation of Certificates of Attendance

OUR COMPANY

More than 40 years of practical hands-on experience in industrial air pollution control system (APCS)

Design, fabricate, install and commission more than 1000 sets of APCS.

Trained more than 4000 pax industries participants and DOE officers.

Training provider of DOE EiMAS for more than 20 years

OUR TRAINER

Dato' Serafin Woo

- More than 23 years of practical hands-on experience in industrial air pollution control system (APCS)
- Areas of expertise include training, consultancy, design, project management, manufacturing, installation, testing & commissioning of bag filter dust collectors, scrubbers, electrostatic precipitators, thermal oxidizers, cyclones, settling chambers, oil mist filters, odour control systems, activated carbon, local exhaust ventilation (LEV), hood, ducting, fans & chimneys.
- Conducted many seminars and training courses on industrial APCS to more than 4000 industry participants and DOE officers since year 2005
- Collaborated with DOE EiMAS in developing industrial APCS Competency certification modules
